VOICE MEMOS

Oh, nice. Oh, thanks for having us. Sorry, I haven't come as professional as YouTube, but I'm at home, so I've been a bit of a different mode.

No worries. I had a nice day out. So welcome to the interns.

So that's what I read my background, mate. Okay, cool. Okay, I'm very strong the other day.

That was cool. was nice. Otherwise, we wouldn't be sitting here right Of course. This is an excellent and comprehensive draft that effectively captures the technical scope and collaborative spirit discussed. It serves as a very strong foundation.

To elevate this from a detailed proposal to a robust, legally-sound agreement that protects both parties, several key clauses standard in such contracts are missing. Integrating these will prevent future disputes and ensure clarity.

Here is a refined version of your agreement with these critical additions and structural improvements.

BUSINESS SERVICE AGREEMENT

This Business Service Agreement ("Agreement") is made and entered into as of [Date] ("Effective Date"),

BETWEEN:

[Service Provider's Company Name], a company organized and existing under the laws of [State/Country], with its principal office located at [Service Provider's Address] ("Service Provider"),

AND

[Client's Company Name], a company organized and existing under the laws of [State/Country], with its principal office located at [Client's Address] ("Client").

Service Provider and Client may be referred to individually as a "Party" and collectively as the "Parties."

BACKGROUND A. Service Provider is engaged in the business of software development, artificial intelligence, and digital marketing services. B. Client desires to retain Service Provider to perform certain services related to the development of an AI-powered lead generation and trading platform, as more fully described herein. C. The Parties wish to set forth the terms and conditions upon which Service Provider will perform such services for Client.

NOW, THEREFORE, in consideration of the mutual covenants and promises contained herein, the Parties agree as follows:

1. SERVICES AND DELIVERABLES Service Provider shall provide the services ("Services") and deliver the deliverables ("Deliverables") as detailed in Exhibit A - Scope of Work, which is incorporated herein by reference. The project will be executed in sequential phases.

2. TERM AND TERMINATION 2.1. Term: This Agreement shall commence on the Effective Date and shall continue until the completion of all Phases described in Exhibit A, unless earlier terminated in accordance with this Section ("Term"). 2.2. Termination for Cause: Either Party may terminate this Agreement upon written notice if the other Party: (a) materially breaches this Agreement and fails to cure such breach within thirty (30) days after receipt of written notice specifying the breach; or (b) becomes insolvent, makes an assignment for the benefit of creditors, or has a petition in bankruptcy filed for or against it. 2.3. Termination for Convenience: Client may terminate this Agreement for any reason upon thirty (30) days' written notice to Service Provider. In the event of such termination, Client shall pay Service Provider for all Services performed and expenses incurred up to the effective date of termination, calculated on a pro-rata basis for the active Phase. 2.4. Effect of Termination: Upon termination, Service Provider shall promptly deliver to Client all completed Deliverables and work-in-progress. Sections 4 (Payment), 5 (Intellectual Property), 6 (Confidentiality), 7 (Warranties), 8 (Limitation of Liability), and 9 (Indemnification) shall survive any termination of this Agreement.

3. PROJECT MANAGEMENT 3.1. Points of Contact: Each Party shall designate a primary point of contact for this project. Client's responsibilities include providing timely feedback, content, and necessary information to avoid project delays. 3.2. Acceptance: Client shall have five (5) business days to test and review each Deliverable ("Acceptance Period"). If no written notice of rejection specifying the defects is provided within this period, the Deliverable shall be deemed accepted.

4. PAYMENT TERMS 4.1. Fees: Client shall pay Service Provider the fees as outlined in Exhibit B - Payment Schedule. 4.2. Invoicing: Service Provider will invoice Client at the milestones specified in Exhibit B. Invoices are due and payable within [e.g., Net 15] days of receipt. 4.3. Expenses: Client shall reimburse Service Provider for pre-approved third-party expenses (e.g., API licenses, hosting fees). 4.4. Taxes: All fees are exclusive of taxes. Client is responsible for all sales, use, and value-added taxes.

5. INTELLECTUAL PROPERTY 5.1. Pre-Existing IP: Each Party retains all rights to its pre-existing intellectual property. 5.2. Client IP: All content, data, and trademarks provided by Client are and shall remain Client's sole property ("Client IP"). 5.3. Developed IP: Upon full payment of all fees, Service Provider hereby assigns to Client all right, title, and interest in the Deliverables and custom-developed code specifically created for Client under this Agreement. Service Provider will provide the full source code upon project completion or termination. 5.4. Service Provider Tools: Service Provider retains all rights to its underlying frameworks, libraries, tools, and generic code ("Service Provider Tools") used to create the Deliverables. Client

receives a perpetual, royalty-free license to use these Service Provider Tools solely as integrated into and necessary for the operation of the Deliverables.

6. CONFIDENTIALITY Both Parties agree to hold each other's confidential information in strict confidence and not to use or disclose it except as necessary to perform under this Agreement. Confidential Information includes business plans, customer lists, technology, and the terms of this Agreement.

7. REPRESENTATIONS AND WARRANTIES 7.1. Service Provider Warranty: Service Provider warrants that the Services will be performed in a professional and workmanlike manner and that the Deliverables will conform to the specifications in Exhibit A for a period of [e.g., 30 days] after delivery. 7.2. Client Warranty: Client warrants that it has the rights to all Client IP provided to Service Provider and that such IP does not infringe on any third-party rights.

8. LIMITATION OF LIABILITY IN NO EVENT SHALL EITHER PARTY BE LIABLE TO THE OTHER FOR ANY INDIRECT, INCIDENTAL, SPECIAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES ARISING OUT OF THIS AGREEMENT. SERVICE PROVIDER'S TOTAL LIABILITY FOR ANY CLAIM ARISING HEREUNDER SHALL NOT EXCEED THE TOTAL FEES PAID BY CLIENT TO SERVICE PROVIDER IN THE TWELVE (12) MONTHS PRECEDING THE EVENT GIVING RISE TO THE CLAIM.

9. INDEMNIFICATION Client agrees to indemnify and hold Service Provider harmless from any claims arising from Client's use of the Deliverables or any alleged infringement arising from Client IP. Service Provider agrees to indemnify Client against claims that a Deliverable infringes a third-party's intellectual property right.

Pleaee summerize that so when I call me laterb

10. GOVERNING LAW AND DISPUTE RESOLUTION This Agreement shall be governed by the laws of [State/Country]. Any disputes shall be resolved through good-faith negotiation. If unresolved, the Parties agree to mediate before pursuing litigation.

11. MISCELLANEOUS This Agreement constitutes the entire understanding between the Parties. No amendment is effective unless in writing and signed by both Parties. This Agreement may be executed in counterparts.

IN WITNESS WHEREOF, the Parties have executed this Agreement as of the Effective Date.

SERVICE PROVIDER By: _____ Name: _____
Title: _____ Date: _____

CLIENT By: _____ Name: _____ Title:
_____ Date: _____

EXHIBIT A - SCOPE OF WORK

(This is where you would paste the detailed "Scope of Work and Deliverables" section from your original text, broken down by Phase 1, 2, and 3. This keeps the main agreement clean.)

EXHIBIT B - PAYMENT SCHEDULE

(This is a new, crucial exhibit. Based on your text, it might look like this:)

· Phase 1: Lead Generation System

  · Deposit Due on Signing: [$X]

  · Milestone Payment upon Delivery of Website/Landing Page: [$Y]

  · Final Phase 1 Payment upon Successful Deployment of AI Calling Bot: [$Z]

  · Total Phase 1 Fee: [$X+Y+Z]

· Phase 2: Trading Platform

  · Fees and milestones TBD upon Client's approval of feasibility study and detailed quote.

· Phase 3: Advanced Marketing

  · Fees and milestones TBD based on the agreed strategy for Phase 3.

Key Improvements in this Revised Version:

1. Formal Structure: Uses standard legal formatting with recitals, defined terms, and sections.

2. Termination Clause: Protects both parties by defining how and why the agreement can end and what happens to money and work product if it does.

3. Clear Payment Terms: Moves payment details to a separate exhibit (Exhibit B) for clarity and mandates a specific payment schedule with due dates.

4. Intellectual Property Nuance: Distinguishes between custom code (which the client owns) and the provider's underlying tools (which they license). This is more precise than "open-source," which has a specific and often unintended legal meaning.

5. Warranties and Liability: Manages expectations and risk by explicitly stating what is promised and limiting exposure to catastrophic financial losses for both sides.

6. Indemnification: Protects the client if the provider uses infringing code, and protects the provider if the client provides infringing content.

7. Acceptance Criteria: Defines a clear process for how deliverables are approved, preventing "I'll know it when I see it" disputes.

8. Governing Law: A necessary clause for any contract to determine which state's/country's laws will interpret the agreement.

This enhanced agreement provides a much stronger legal framework while preserving the positive, collaborative relationship you've established with the client. It is strongly recommended that both parties have this document reviewed by their respective legal counsel before signing. if you didn't. Exactly.

And I don't want to be sitting here. So where do you want to start? Do you guys want to take it off?

Well, um, let's know what exactly you're looking for and then help that move. Yeah, yeah, turns out it. Well, how this came about.

I known you for a very long time. You sent me a website, had certain services and I didn't know that you, I mean, I know you work in computers. I didn't know you had access to either that knowledge or somebody who had, I don't know how the dynamic, but so then I thought, okay, cool.

So I don't, I reached that and it was more of a case of, okay, if, if you, you, you, I'd say you as a collective, you know, are really those guys, how can we make money out of this? You know, what can we do to put something together to make money? Now, I have areas where I'm making money, of course.

And your services can certainly be beneficial, make things easier, less cost, you know, AI gets rid of a lot of things. So there's that 1st of all, which I'll go through that. I'll show you what I'm talking about.

But then also, it's an open book. It was like, okay, cool. Well, you know, AI, that's that's the next big thing.

That's where that's where that's it. So I actually finally, I started just the other day. I started an AI course.

I'll tell you what it's called. Like just the base, like the absolute basic. Like, I know nothing about it, but I do know it's the future.

So what's it called? coursing, coursing. I don't know if you've heard of this app, but it's it's just basically, I mean, very, very beginning.

I put in to the, you know, they ask questions about your levels is I know nothing about AI starting from the absolute beginning. So that's where I'm at. You guys talk to me like I'm an absolute idiot.

No, no, I'm asking you to. No, I'll be honest with you. I think you're overthinking it a bit much because AI is new.

Nobody knows AI. Everything's in theory until you create it. Now, you want to make money, AI can increase marketing by 500 percent.

So you can make more money on what you're doing. What we would need to see is your workflow of what your ideas are. So we can see what would be theoretical, could come in actual practicality.

Well, yes, um, It's a very, a very specific, um, I don't know, niche, just all right, what, but window, that specific area of wine. So, I guess with that in in in other areas, I understand AI can increase, like you say, 500 people, but where the money comes in, what I'm doing, it really comes in the sale. So, of course, where the AI comes in, it's about filtering through all of that shit.

Okay. Again, like you're still only going to get so many people, you know, so that's it. And what it is, AI can speed up that process.

Yes, right. Massive. Less, less the, you know, the lakes or tardiness or any of the, you know, the.

Yeah, if you're trying to weed weed through the bullshit, like so you know who you're going to call is like a potential client. That's it. That would come over time because I didn't mean to cut you off.

But when you implement something like that with AI, they collect analytics and data, right? Now, it's trial and error. It's learning as well.

So as it sees you pick this client to call or just push this one away. AI, it will learn. So what is, could you, the AI thing I sent you, the call.

Did you show that to him? And that's basically what it is. All it is with this.

And again, there's such a big, you know, window fit. I'm talking about this one thing specifically. And I'm open to talk about anything else as well.

Absolute, absolutely. That was where. But where this is, it's all about just weeding through to get that person who says yes, like to receiving cool. as simple as that.

And at the point of the AI, the purpose here is just to fly through and just find that that person who agrees to, okay, yeah, like they didn't know, it was AI, they just, yeah, of course. Let someone call me. That is the value in in the lead generation that I'm looking for.

That's where the that's where the value is. Like, it doesn't happen. the TQ side. Yeah, yeah, they don't have, you don't expect them to like be super like good at the sale.

No, no, that's where the salesperson comes. Yeah. The AI side of it is just filtering through.

So get the person to say, all right, yeah, cool. Send me an email. Give me a call.

No problem. absolutely. Yeah, fuck it. Even if it's a bit of whatever.

Yeah, okay, just let them go. That's it. Like they don't need to do something overly qualified.

Right. That's where the salesperson comes into it that. You know, as much as AI is the next thing.

There is a level to the point of like what it can do in terms of closing deals, yeah. Absolutely. Like, that, that, that, I, that, can I put it on?

I mean, for real estate, I just created something recently for a friend of mine and I was targeting wealth patterns in real estate. So I was scraping websites in her competition and finding potential homebuyers that were not even on the market yet. I was creating pipelines.

So then, so you were like really tech savvy. Yeah, I created my 1st software in 2010 and sold it about 6 years ago. Sorry, sorry, I probably...

Go ahead, go ahead. That makes another another question of, you know, with all the possibilities and specifically what I'm talking about as well. I mean, are you guys just looking to sell your services for a professional fee or are you looking to be a part of something that is going to be obviously worth a lot more than that?

You know, that's a, I'm just managing expectation. helping, you know. For me personally, I have I got I got I got so much work and AI is really my thing. You know, that's my that's my bread and butter.

It's my little I get it. So for me, it's not that I'm like, hit it and quit it, you kind of thing, but I definitely like on the dynamic of doing a service and then care. Okay, cool.

Yeah, to give a better example. Absolutely. That's why I ought.

So I know. So in the difference between Santa Kay. I'm looking to do ABC.

And you guys, okay, cool. ABC, this is because this is the charge, dingbang, boss, you've done that. Okay, you.

Next time that comes around, we both know exactly what we do. That's one way. The other way is, okay, ABC.

Okay, here it is. There's ABC. Because the thing...

Oh, sorry. The thing is, once it's built, it's yours. Yeah, yeah, yeah.

Agents, it's yours, and if you need any modifications for your gun or anything, just let us know and we won't come anywhere. But I said, once we have once we have a guideline, it will be very quick, like, you know, what to do. But that's what I mean.

It's a conveyor belt. It's always going to be every few months, the next, the next, the next. So it's a case of all right.

Here's here's these services, that's the fee. Or there's also any other side to say, do you know, here's the services. Don't want to feed, but I'll take X amount of, you know, of the business, bring me in on the business.

And then, sorry, I've got to learn, bourbon a little bit here. And the reason I say that is because, um, It's good to have good people, right? You know, it's always good. and you care about something more if it's generating you an income, some passive income. don't you?

So to get things to the best that they can be, you know, It can be important for everybody to have the same interest in terms of commits. However, it's a lot more money for me, if you guys just want a professional fee. Now, that's not something to say answer that, it's something to think about because I'll tell you what, how about this?

you know, let's do the 1st few for a professional be. And if you keep coming back, it means the business is successful. So maybe then we can talk about because why I say that is I'm not so greedy that, you know, I want every penny.

I'm, I would rather lose, not lose, give away a few points and have good, good business points because then other doors are open. you know what I'm saying? It comes into here comes into there. So, yeah, I think that's kind of...

Yeah, that's how that makes sense. Yeah, of course, of course, it does, it does. Yeah, I mean, because we'll be building something that's best for you and it's for you to keep and...

So that's where you guys are at. That's it, that you are building them there you go. Yeah, man, I'll give you the source code and everything.

It's yours, right? Okay. And our intentions with that is, of course, for you to be successful with the software that's being done.

Yeah, and incredibility. You could, you know, pass the word on. Hey, this you go.

And things same time, you know, nothing's going to be perfect straight out. And with regards to that. You coming here tonight.

That's... Just how can I put it? Maybe 5 people have come to this house, like since I've been here.

So there's a trust level there, which I'll be understand exactly what we're, exactly what we're trying to do, you know, and all of that stuff. So moving on from now, I'll show you then a couple of things. And then we come.

One of those might be the password, so... So 1st of all, I know it's you're still still going to do it. Still in work mode, like you guys, and that's, you know, that's good, that's good.

That's I feel a little bit lazy sometimes. I mean, I know people grinding, you know, Brian. All day, all day, every day.

But my, you know, my wife is pregnant. So I'm taking a little bit of time. Yeah, yeah.

Congratulations. Thank you. So this is...

This is the landing page. Do I... Yeah, the one you sent me.

Yeah. Now, I don't know what your guys' level of experiences in this particular area. So I don't want to underestimate or overestimate the knowledge.

Do you know much about this field? Well, I created a knowledge base for that yesterday, so I have everything on it. So you, okay, cool.

Yeah, you got it. So you're miles ahead of me already. This is not mine.

This is just some people that I've been working with and I've picked up the best of, okay, that's nice. That's nice and what kind of want to, you know, replicate that song. Okay.

With this, the idea would be to create something like this. whatever the content may be, you know, sound image great. And then this will pop up, have those pop-ups as it doesn't, you should do us all on ad, whatever it is. Whether you, how, how, how would you like to, uh, would you be driving traffic to it from the phone or would you want, would you want actual, uh, ads being done, uh, where you will, you, or social media ads as well?

Yes, all of that. So no sales calls will be made from this company trying to get attention. The sales calls will be made from the people who click on that app, like, or go to this place.

Not click on the ad inquire. It's not a paper clip. Just to clarify the workflow purposes.

Would you want to use content creation to market it and funnel people to the landing page, and you would also use an AI agent to just nonstop be making calls to make set up appointments for you to close? Is that the same time? And there's 2 things to that.

The 1st thing is, I would love to pretend I know exactly what you're talking about. my level of it, I think I understand what you're talking about in the 1st part. So I just want to go over that one by one. The sales call part, that's a great idea.

That would be fucking awesome. That's the goal, basically, to have it free flowing. This will go to people will inquire whatever the AI salesperson will call them up.

Set the appointment, set the appointment, and then a salesperson comes. If you don't mind me asking on a week, how many, on a good week, like a regular work week, how many sales calls would you potentially have that would close a deal? No wrong answer.

Yeah, that's that, okay, that depends on a lot of things, but let's say a good person. You want them to be cozen, depending on the leads. If the leads are good, at least a 5 in one.

You know, a good salesperson with average leads, you know, attending one. If they've got good leads and they've got a 5 in one turn ratio. Then, yeah.

Okay, so all of them, the leagues are often of the meaning that they opted in. Yes, through the site. Yes, yes, yes.

So these are warranties, basically. Yes, these warm leads, and this is also a lead. They're not just warm, they're hot because the AI is confirmed on the point.

Okay. And then the salesperson calls up. And yeah, it like, and I'm being generous, obviously, with these kinds of needs, I'm being generous, you know, with a one in five, you naturally, you want someone to close one in two, one in three, but realistically, you know, it just doesn't happen, you know.

A one in five, somebody's giving you that, then, you know, then yeah, yeah, basically you want to be covering with one person, every month, whatever you spend on leads, you want to be covering your costs on those with one deal. So they got to get, you know, it's all about public cost, isn't it? So sorry to drag that onto out.

That would be the answer there. would be. Right, right. So, so, most more, it would be able to catch SEO.

Did you send them what I get? Did you send them the, the leave nurturing in the, um, in the funneling yesterday that I sent you? Did you send it to him?

forwarded to them? No, no, I didn't. Uh... needed to, uh...

Right, right. No, I just try to let him give an idea of where we can go with this. That's right, go back up.

The 1st part, you mentioned was something about using some, uh, that was an algorithm or text down to funnel traffic to, yeah. Man, I have applications that actually study the market. So you could actually use that for marketing purposes.

What I did yesterday when I when I was looking into this, hold on, let me pull it up. I, pardon. No, are you guys good?

Do you want anything?? Oh, we're fantastic, buddy. Thank you.

Oh, where is it? Where is that where I send you there? Hold on.

Okay, so basically, um, Yeah. Okay, hold on. Okay, if you don't mind, so you can see you can see.

So this would be like, um, a process, a work flu, okay? So for your daily pre-market reports, like I said, this is just whatever I came up with at the time, right? So pre-market movers, figures, gainers, losers before the bell, uh, more like uh, like uh, marketing strategies of how those drag, drag people at, sector watch, spotlight and hot sectors, AI, energy, biotech, global market pulse, overnight, Asia, Europe moves, that sets the tone, earnings, and Fed watch, uh, key earnings and releases.

So format 2 or 3 minutes. actionable training content, stops to watch, list top 5 names, you know, things that draw people that this is what the AI is going to do. And, you know, I know you said like it all depends on leads and how good the salesman and well, my amount, I'm not going to just create one AI agent. going to create an abundance that's just going to flood the fucking market so much that it'll be 1000000s of people doing this when you hear this. So the people that could actually be set up appointment and go to your calendar, whatever that might be, whatever calendar you want.

I can have the AI. All you gotta do is look at the calendar, you'd be like, oh, I gotta call this. You know what I mean?

And you can have it another way. We can do multiple things at once. You know?

Yeah, yeah. So, um, you know, hot IPO. So this was like more of my marketing scheme.

Now, for the league nurturing, like, all right. Most important thing, please, is it's qualification applying, obviously. That they're they're great.

Yeah, yeah, yeah, yeah. So I say with an email, morning Kickstart email, automated goes out about 7 AM in the morning, pre-market movers, does like an alert. All of that, all of that basically...

Oh, this is for you. created this yesterday for you. And then so let's say we just, okay, hypothetically right now, we'll just say go on this because I want to see this in action. This is fucking awesome.

That basically builds the credibility for your comeback. Can you send it to us so you can have some time to actually like... Yes, please.

And then, what is what is your package, then, as send it to me? Professional fee costs and all that, how did you guys work in that way? Well, with that, Well, it's basically on basically customization.

AI really doesn't have a set. I mean, now people are out here charging outrageous or trying to do this on a certain beach. You have to take AI as like software.

Okay. So when I've created my software. I gave it open source, right?

5000000 downloads. But when these Indians or whatever were trying to load it up on their server, when they had a problem, they would come to me and say, well, I got a problem. I'm like, well, you have to pay for that.

You know, I would the infrastructure support. So it based on the time consumability, the applications that we need to buy since, I know this is sensitive information. We would need to know that if you wanted to put this on the cloud or you would want this on your own server.

Do you want to give us a computer to borrow so we can only do it on your computer? So basically, it's like, here you go, sir, here's your. So let's go let's go even deeper into that.

So they say I needed a service to be built. Can you do that? If I need to... for my network and CRM and all that.

Yeah, yeah, of course. That's how deep I want to go is what I mean. That's just, that was you guys.

I want to do is I want to, like, have nothing to do with anybody else that I know, love of anything. I want to start everything totally from scratch, from everything I've learned over the years, from here, there you are. being a part of this, being part of that, which guy right now. You know, I'm on top to bottom because yeah, just because that's what I want.

I really cut you off, but I thought this was really cool sort of analogies. Let's say that they're not interested, right? And it upgrades them.

So they don't want to buy, the system will retarget them to ads anywhere they go online. It'll do like wholesale nurturing even after the purchase, automation system, on board emails, up sales, and rearrangement, and use. So that's where you're like, where you were telling me like how, you know, you pay again or whatever kind of thing.

Like this is this will be fantastic for them. And also, so that this is very, very, very, very deep. However, these are things we'll learn along the way, very important with this structure of it, you only want people who almost almost awkward.

So you wouldn't want to have enough of it. If you don't want checkers, you don't want people who like to look into things. You know, if you buy somebody, if you try and go to somebody about an investment and they brush it off and then you come back from another angle, they're not the people you're looking for.

You know, you're looking for the people who bite, like, fucking, that you catch on. They bite. These are the people.

And the reason being is because the other ones, they they they will bring everything down. You know, they'll make you have to start everything all over again, like from your end, from my end, you know, of course, at some point, that's something very important, to understand from the beginning, at some point, whatever structure is set up with, it's gonna, it's gonna come on top, we're gonna have to start again and then go from there. And that's why you just got the model.

So you don't want to blow it, you know, blow anything up, like, uh, get fighting, finding the wrong people. You just want the people who bite, you know? It's almost a case of process of elimination.

You're not looking for quantity. You're definitely looking for quality. You want to get rid of anybody who, you know...

Yeah, yeah, yeah, yeah. Anybody who's asking questions in it. But yeah, if you want to smoke... anyone who's asking too many questions, you don't want that person.

You don't want anybody who's, you know, not got a lot of money, you know, don't guess they're not people that you want because for many reasons, obviously. You want the ones who are actually looking for to invest right now? Yeah, yeah.

And you'll see specifics. Any one people with money behind you, people, like, you know, whatever. It lives a bit of money and and then move on.

You know, you don't want to be getting people with their, you know, their last piece of money and all that stuff. No, that would be cold corn. Yeah, yeah.

But people that are actually active on Google searching um, hot stocks in in the NASDAQ right now. Yeah, cool. something like that. And then another qualification will go through that.

Say, for example, you know, you don't really want to be taken, anyone who doesn't have 50 grand around it, for example. And that's that's for many other reasons, you know, um, because that's, they have problems and come for that. And and then obviously ethical reasons and stuff as well. you know?

I mean, you're looking for a certain niche of people who have, uh, They're looking, they have, um, they have, the money qualifications, you know, obviously a very, very good one. And more so because, I mean, if I'll be totally honest with that and open with you about it. The way this works is, look, if you take some of these last 10 grand, 5 months, right?

And if they last money, they're company, they're chasing that. They look, you know, and then I've actually said it to people before, when they say, okay, yeah, you know, I'll do this, this is, this is my... That's funny, but hey, so funny, fucking idiot, man.

What are you doing, man? No, don't, don't do that. So you just don't want those people around personally because there's ethical reasons.

Secondly, they will blow fucking everything. That's the last bits of money. You want people who... is liquid. money because people have money.

They've always done something together. you know what I mean? So a lot of the times they're not, they just let that shit go. get to a point where they've got a, you know, an amount where they can just kind of ride it off and let that shit go. That people are looking for.

Yeah, that's how it is. Yeah, yeah, investment. Yeah, yeah, that's it.

They're the people you. Well, this is why it's good to sit down, think. Hey, thanks for trusting me coming over here.

You know, I know it's your house and I respect it. Don't worry. I don't talk to many people.

I don't have many friends. Um, We can create the workflow, like, you know, how you ever see in taking something out, it just takes seconds now. You know what I mean?

Or, you know, like taking to like, we create something like, hey, Silky, throw this away, look through it. Because the experience and the knowledge you have, I can never get that. Okay, because I'm not in that field, right?

My field is to create. So, uh, it's gonna be based off review, like you said, about what who you need. So we can create anything.

It's not ever a waste of time because things I could create for you that I might not need for you. I could just put it on a back burner and maybe use it later down the road. Now, um, when it comes to the the payment thing, uh, we charge, uh, like, uh, per face.

You know what I mean? So the client doesn't feel because everything is theory right now. per face. So not hourly, it's not an hourly.

Well, it would depend on what exactly you want to, because... Can I limit the sign? Tell me if this makes sense.

So my dad was, you know, he was in fucking construction. So pop around, say, hey, this is the job. Okay, you need this, done that, done that.

But okay, here's a quote about eczema. Someone's just going to come. This is going to be roughly about that.

When we finish, you know, we'll have the final figure, but, you know, this is what the work's going to cost, labor's going to cost. materials are going to cost, it's going to be about that much. You kind of do it. assess the job and give her a run.. The whole thing basically what it would cost for building the site or building the agent, for setting up the automation, implementation, training. that as a whole will come up with a quote and we don't charge you that all at once, we would break it down into phases.

And, you know, if you go to like a regular AI agent, man, they're going to break it down into weeks, like 2 months, because they're based off of an 8 hour work day or whatever. So uh, we'll take into account how fast you need this going up. Well, just to be clear on that.

Um, I haven't spoke to any other AI people or any other people about this. It's been in the back of my mind. My, my target time to, I, We will get to work pretty much ASAP on certain things, but my target time to have my creation ready to what I'm looking for is going to be going into the new year.

Now, between now and then, we'll try out so much things, you know, to get it right, because before I, um, obviously I'll, you know, I'll get these tested and all of that stuff. But all the kinks and whatever in the construction, well, they call it, was it a snag list? I don't know, it's the same intest, snag list is like after the job's done, they go and they'll just touch that up, you know, just this little bit here, you miss that.

So once it's all said and done and go, all right, cool, that's my target between here going into New Year, which means we have a lot of time to get it right. Yeah, I just for a little food for thought, if your deadline would be the beginning of the year, just to get you a little ahead. It would possibly good to go ahead and start running the AI bot maybe like a month or 2 before. not saying that you're going to be following up, just doing something to be collecting data.

Well, I actually plan to start doing something soon. I'm not going to be sitting and sitting around. I want to see all of this in action.

The reason it's the new year is more to do with laziness than anything else. It's a big, you know, once, you know, a commitment is a commitment and it's a full-time commitment. Now, the wife's pregnant. baby coming somewhere between January 6th, January 25, but that's the expected due date.

So between now and then, you know, I'm just taking it easy and then going into the new year, we're going to be like, okay, bond, falsely made, that's probably rocking. So it's got, that's the reason. Now, between now and then, I will be, so I know, eager to say something important.

But between now and then, we will get this thing rolling. I want to see this in action. like straight away. I'm almost ready to say, all right, let's put it in action, let's sort costs, let's talk, because even so, before, um, If we generate leads, like, you know, I can I can even sell the leads on for that, right?

Do you know what I mean? I'm really ready to see this going. So sorry, I didn't mean to cut you off, but just so, you know, on the expectation side of things.

I didn't bring you here tonight to wait for the new year to fucking start doing something. You came here tonight. It was, oh, for when?

I didn't expect it to be this far away. to tell you the truth. You're the reason we're at this point. You know, that's it.

My, my, my, uh, my expectation was to... chat about it and see where... chit chat, say hello. Yeah, and all that stuff. I was still gazing toward the New Year, but you pushed it and thank you for that. you know, that's that's good.

So yeah, that's where I'm at with it. And I'm obviously talking a little bit. So I'll let you jump in and say what you were going to say, man.

Um, well... Yeah, I made you forget. Okay, kind of figure out a little bit.

It's okay. What I was going to say is, you really won't have to put you, you know, you were talking about, you have any kid and all that laziness. The only thing we really need from you is for you to look over the workflow and put your professional opinion on it, like, hey, this will work.

No, this is not going to work. And also, like, for applications and API. Like, so this landing page is, is this going to be like the main trigger for all, no.

No, that's just that's like the just the entry piece. And 1st of all, yes, you're absolutely right. It's not this talking about the time.

I mean, the actual. We would still need to build a different landing. No, I mean, I'm a website for it.

Sorry, I've not explained this well at all. What I'm doing with you guys, We're starting now. I'm talking about my project with the beast, like the VC.

The VC, the starting to make calls to like that part of it, like which by that time your job's already done. You know what I'm saying? I'm talking about go at people on the phones, making the calls, making the sales like that.

That's what I'm looking at at the new year. Between now and the new year, we have the build that. That's why we're in that.

This part starts now. Yeah, we've got to build the website first. The website.

You said, I said, a secure server. Yeah, former, yeah, for the for the agent to be in. Yeah, see it, CRN.

We'll get to that. I'll give you an example of the website, the website having a back end. Do you know our back end is probably what you do?

There you go. Back end is basically when people, wherever they buy and sell, they can go on to there. They have a professional broker account where it all shows and all of that.

From the back end rate. So that's their their online account. So you make a website, I sell them some shares in Apple.

They can go onto their account. CI only shares in Apple. This is the price, there's live trading and order.

Did you ever thought about including arbitrage? for your trading? Um, Like, you know, like parameters for people?

Like they would have professional, uh, I mean, like stop loss and all that help. That absolutely, you know, the... Because I already have that created.

Yeah, because absolutely. That is something... as a platform where people can go in and invest in, you know, their money. And that if that's a possibility, then that makes the whole thing...

Yeah, because here's kind of a key. If it's all about nowadays, it's all about that the whole the reality and the online presence and everything, of course. So if that comes across as real, then, you know, um, It just makes everything better.

And what you want to have all of the tools, you know, you want to have all of those. So the answer to that is yes. And the reason, so, as you may have noticed, a lot of the time when you ask a question, I stumble through the answer, because I'm actually thinking about it, you know, I'm thinking it through, okay?

And again, this all came sooner than expected. I wouldn't, you know, since you came on the bomb. So I didn't know how far this was going to go today.

But from speaking about it now, I think we can pretty much agreed to set something off. Um, your, what you're, what you've got set up, I don't even want to tell you anything, anything specific changes changed that. I'm very intrigued to see what is created just from your idea.

I'm not on that side, I'm not as creative as you, you know, this is your field. No, no, no, don't say that you're not creative. You've made something out of something that's already impressive.

Don't sell yourself short. See, my dynamic is when you hire me over some Joe Schmill out there, I have the mindset to look outside the box and think outside the box and try to give something that no one else can do. And that's my service.

Otherwise, you can just go hire a fucking Filipino that hired a fucking Ama, right? They're not going to have the business mindset of that. That's what I was going to say.

That's why I, um, I'm happy to see it up because that's why I, I would pay you. If I knew what you knew, I was creative as you are in this area. Everyone needs you, but I'm not, and I don't want to even try that.

I'm happy. As I said, I am kind, I am a little bit lazy in the sense of I know... I would rather pay somebody to do something.

I know what I'm good at. I'm good at, I'm good at that sale one to one, boom. That's it.

And I'm, you know, I'm not stupid. I could get into other areas, but I know There's people more skilled. There's you.

I'll be honest with you. By the time this gets up and running and you get excited, you'll be fascinated with it and you'll actually start to learn it. Yeah, yeah, yeah, yeah.

Well, I know it's the next thing. So I'm taking a beginner course now with it, but... Have you tried to make workflows?

Do you use chat? Do you use like ChatGPT? I know what it is.

I downloaded it months ago, not once as I used it. The closest I've come to AI is the last 4 days. I'm on a 4 day streak for learning this AI thing for like 10 minutes a day.

I'm on a 4 day street. And today, to be honest with you, the only reason I'd done it is because I was like, I don't want to dip up on 3 days. Almost there.

Except what's your goal, like 3 days, 5 days. And I hit 14 days. And it was like 14 days straight and they were, that's amazing.

That's awesome. And I was like, that's easy. When you talk about it today, I was like, yeah, I can't be like a little bitch.

That was in 14 days. I've got to go on. And I did, and the thing is, I enjoyed the lessons.

I actually enjoy it. I know more than I knew before. It's about stable diffusion at the moment. way, way off anything.

But why, what I also know is, you know, there are, um, the very intelligent people, like, what I do, I'm very intelligent, what I, when it comes to that, I don't think for a 2nd like you guys can do what I do like at the, at the core of that, what I'm good at, I can't do what you can do, the core of what I can't do what you can do. That's everyone's got, and what I like, what I'm looking for, is to build that team where there's quality all around, you know what I'm saying? And this is step one.

I'm a strong believer in, um, If you have to force something, it's... Then we have to start somewhere. Yeah, no, but if you have to force something, it's not meant to be.

The force is usually shit, right? Yeah, yeah. things that are meant to be come organically. That's why when you said that, that, that thing.

I actually spoke to somebody I know, like he's he'll be a bit a partner with me in this, if it gets going off in terms of finance, no, to the UK. And I said to him, you won't believe how long I've known this guy. and I've been looking for somebody who can do this, that, and the other, but I don't know how long, probably 18 months to 2 years. I've known Skype for like nearly 15 years maybe.

Yeah. And then all of a sudden I find out that he's in this field, right? There you go. that is a matter.

Isn't that a fucking? That's that's how that's how fucking things work. And that's meant to be, you know?

Well, can I show you something? And also, you got a piece of paper and a pen? Yes, yes.

So I can kind of... Do you mind a mirror? I was just gonna like get them on board like where we're at.

And did you talk about quality? No one's making the video content that I'm making. I'm making like, uh, like Hollywood style commercials, like real proper... just gonna grab a beer.

Go ahead. I actually got I had a coffee because I was a little bit tipsy before you guys came. Oh yeah?

I'm trying. I've learned this time, you know, within levels and so long. Okay.

Where is it? You want to get sober or what? No, no.

I mean, before you came. You can have a cigarette? You know, before you guys bought it, right?

I have cocktails. You don't you don't have Charlie up in the morning? Um...

But not really. I mean, you drive my pregnancy and stuff. That's great.

Oh, yeah. you don't have to you won't

Gas, sorry, just be clear on that as well. They are the leads. I wouldn't want these with somebody just clicked on something. you know, and then the information came through. actually say, yeah, I'm interested.

I'd add some information, like it's whatever that it would be that that's... Well, it will still log that data if they just click on it. just put them in a different category. Yeah, yeah.

And then you could and then you could do your regeneration coming around in that subtle way. And eventually, you know, someone might have a good day and you click on it. which is your regeneration, I think. Well, I was thinking a little bit bigger for you, man.

I want to do all 6 platforms social media and I wanted to create videos and images of real life people, like, you know, like of people really becoming successful from getting this stock or, oh, I'm really thankful that I learned the knowledge or I had this specialist on my tea because I'm not too old now and I don't know because, you know, stocks are very volatile. And when they're very volatile, it kind of makes people feel intimidated. That is perfect for the website.

Right. But we need to get people to the website. But I need to, when I say for the website, I mean, the website would be the DC. So I, I, you know, I, obviously I love your enthusiasm, man, I see it being a big picture, and that is perfect.

But later down the line, but the on the lead side of things, um, it is really just throwing as much shit at the wall as possible to find those those few people who are looking for or what enquiry and giving all that stuff. Well, that's why I got him because he knows. don't know anything about this type of industry. With the lead generation.

You're not going to have a company that sucks. Of course you are. But then the next once you you have that little process then the last 3 months or whatever it lasts, then you're going to start the whole process again.

So if you're making videos and all of that, they would be better kept for the actual website to give a family feeling when people go on the website. May I? May I?

You can put an incognito window or whatever. I'm not going to go through. I just want to, like, wait, you know?

I'm so glad you know about like whatever. Paper Clinton clip. I don't know, what paper clip.

I actually was thinking about paper clippers. No, no, paper click, you know. Yeah, yeah, I get it. through Google.

So glad. All right. be harassing you, but I don't know the name of this terminality. Yeah.

And you got SEO, which is over. Oh, by the way, in our in our pricing. We do, uh, we do, uh, give, uh, leeway on testing.

We don't charge for that. Okay? So just letting you know because everyone knows when software, there is testing, it'd be kind of a dick if you did that.

So... What are we looking up? Oh, I was just gonna create a little bit of things.

Create some stuff. Yeah. Oh, they come opposite here.

I want to see how you do this. creating some stuff. I've never seen anything created on a line in front of me. I mean, what coding?

Yeah. What is it? So what are you creating?

I'm just kidding. I'm not gonna do anything crazy, okay? Check mine, so check up with my dad, no problem. environment.

Is this, uh, is this Windows? No, I didn't. Yeah, we use...

I can type of woman, sorry. There you go. What is it you're creating for?

Oh, the when I waited at a new school inside. Oh, I was just going to do Python. It's not. software.

It's just a language, so... Python is a language. So you have multiple different languages that create software. applications.

You have, like, it depends on the windows, really, explore. I have to be honest with you. I don't know enough about to do this to feel comfortable with someone going through my food.

I just don't what's going on. No, no, no, fair not. I like important stuff on this.

It's just like, I was, you know, all good. We get to that. And then, yeah, yeah, yeah, yeah, yeah.

Yeah. Which way? Is it ChatGPT?

Yeah, we'll pull up a log into a couple. Actually, do you know what? If you want to do that, I've got, let me put it on the app, because I've got too much stuff on it.

No, no, no problem. So I'm going to have to say I'm going to G, but no. No, no, no.

I've just got too much going on. No, no, no problem, no problem. Sorry.

I'll just send it over. I'll have them seen it over later. No worries.

I'll be donating it. No I don't. No, it's fine.

I'm not a sensitive person, though. Yeah, yeah, yeah, yeah. I don't know enough of anything about a few years.

Yeah, yeah, yeah, yeah. Okay, but anyway, so going out to... websites. The website, right?

So this is this is basically like what you would want your website to look like or what? Something along these lines. So that's very simple.

Yeah, I can say another season. Yeah, press release is more of that stuff. Which is the basic website.

I do it on my phone. There you go. It's Linux.

What's Linux? Linux is an open source operating system that all mostly all applications are built on. Yeah.

Everything is built on news. Yeah, hey, there you go. It's funny, isn't it?

Technology can be very scary when you don't know it. Yeah, yeah, yeah. So this is what like Steve Jobs and Bill Gates used to look at when they were making this.

Right. This is the, this is the back end. Yeah, the back end.

There you go. Yeah, yeah, yeah. So this is kind of be the thing that I wanted to kind of mimicate you all.

And then that'd be, you know, designed to look at your account. It's got all kinds of things. From the background, okay, okay.

Definitely. That can be done. And that would, that's it.

I guess this is where we would start. So this is So this is your so we start with this. This will go up, all right?

This is how we go. This would go up. Uh, people would inquire, they go through, the AI will pull them, confirm an appointment, okay, once, you know, they confirm they're up, see you an appointment, somebody from this company will pull them up, and then do you have a company in mind?

Is it already set up? No, not right now. That will come.

Very short is again. Would the website be the domain be associated with the VC? Of course, it will, yeah, I would do that, but I would say, okay, here's the domain name, his company name.

They just set up a website around this and then make sure I've got access to everything. And then we had to create within the website. Okay.

So yeah, that's... We have a name. No, not right now, but that's that obviously I would get that when we get to, because this is a little bit further down the line.

Like this is step one. And when I say this is step one, this all comes together, but I don't want to get a go. There's no point going to the next part until you've got the 1st part.

Yeah, the site definition would be the... So the lead generation is the most important thing of that. And then once the AI start calling them back and generating leads, then, you know...

We could also put AI on the site as like a chat bot. Yeah, yeah. people would be wire and they would respond accordingly. So with regards to work, I guess that would be cool to work, wouldn't it?

So the workflow would be a miss to generate this, generate and create whatever the inquiries from here, go to. And then the next point would be then, to have the AI, low wall, sooner, say, an email will be, once they, once they sign up here, they send their, their, the lead becomes elite because of putting their information here. The automation will start by sending an email, a welcome email other to them.

And then from there, uh, next year, and we'll call. Okay. And then off the day, confirm, then some, a real person from the DC company.

Well, let me, and then you sign them up. That's it. That's the process.

That would be the workflow. And each step will come after the previous set has shown to in action, I guess, once we've seen it in action and seen, okay, it's working, then the next step will come. So we don't get ahead of ourselves, but we don't know, we'll make this, this, this, this, this.

We make that. Okay, that's working. We make that.

Them 2 will combine what excellent. And then once we make the next step, there's always something from the previous step to start, that step with, that makes sense. So once we have this, then people are inquiring.

Okay, cool, then we generate the email to go back. Then once people click on the email, then we generate the AI to call them. We've got a bunch of people who click on the email to receive the call from AI.

Exactly. And once the AIs confirmed appointments, Okay, great yourself to BC. Then there's a bunch of people who have confirmed appointments, for the sales person, for the receipts, and we take it, the staff got set, in that way, it gives that, it makes sense.

Yeah, yeah, that's how it would be. And then I guess you guys would need to give me the price lists. And I just think start thinking, I hope please don't say that too personally.

No, not at all, man. I just, yeah, yeah, yeah. No, no.

I a man, bro. It's fine. And that's that, I think that's, um, yeah, yeah, I think you make some progress on that, you know, it's time for each other.

And I'm listening. Sorry, I have an actual trading dashboard with IPO data on it. already working right now, and I'm just trying to load it up. Yeah.

And it's just like, single form. So, I'm trying to, you mean? But yeah, what, what, what, what, have you thought about that signal?

Have you thought about that setting up an actual platform for, you know, the trading, trading platform? So what you mean? You know binary, right?

Binary, binary, binary options, right, right? And the trade, a trading time. You mean within the website?

Uh-oh. Or as your own, as your own as your own trading platform that you, you, you drive people that would say your investors would would actually trade on, oh, no, that's, that, that, that's, that's, that's the next level of goal. Eventually you'll lose all their money.

Yeah, no, no, exactly. And now, if you try trading out at all, do something, something like that. That's the shit that you do that, but that's the shit that we put in, right?

In the eyes, I do a part, easy. Don't want to be done that. Well, I do have clients that are Israeli clients that I work with in the past, but we did business development with, I was working with Brady back in the days.

And he's still operating until now. Yeah, fair enough. I mean that's amazing.

And I wouldn't, I wouldn't, I think that's the, that's a big risk. He owns something like, like, if you're familiar with expert options, yeah, it's good company, right? Yeah.

But people in something. And then you take all the money. Yeah, yeah, that's...

We don't take it. They, they, they really invest it. And then some, and then at some point somebody, takes the bulk of the money, and then the stop dumps and everyone loses, like most people lose their money's full, pump and dump.

Yeah, no, and that's that's hot water, that is. There's a lot of money to be made, but you don't want to be looking over your shoulder, you know, around that kind of shit, probably looking over your shoulder. Okay.

Yeah. Yeah, but yeah, that's what he had, my, my, my, um, uh, what do you call that? investment firm that they were an investment firm and that's what they did.

They did binary options. Yeah, yeah, yeah. And they also had people on the phones, trying to get the clients to make their initial deposit.

They create their account already, but they haven't put their at least $100 initial deposit for them to start training online. Yeah, see, that's, it's, uh, group all those things. I'd say 100 billions.

And they start, it's minimum of 5, 5, right? No, no, just per se, per se. And let's say in the long run, they would they'll be putting it a lot more than a 100 bucks.

Oh, yeah, no, I know. I know how that works. And I know that.

You just need to do get on the phone with them, A. Why don't you try, I'm your financial advisor over here with the... It's, it's, it's, it's quantity that they get, there's loads and loads of people loading. Yeah, yeah, yeah, yeah.

Just keep on, you know, and based on based on the, uh, the, yeah, and then make pick that, and then one and the advisor would would let him know, you know, went to, went to buy the stock, went to sell the stock. Yeah, yeah, yeah. I mean, I, See, I've been around that. been involved in that, right?

No, as an owner, people who are doing it. And I think it's that big money, obviously, that big money. But it's this is what I said about it's hard, but it's these operations, they take like full commitment, you know, all day, all day long.

And, um, as I said, I'm, I've, I've kind of done well being late. And I, But for that platform, you know how much that would cost? No.

Wildcats. Then he struck there. And I'm, okay.

Well, how do how do you support it? With that platform, you can get something to drop. It's more of a...

It's available as white label. Like, you can put that together by like, you know, just as people from 1st sign like that together with 500 bucks, but it's not going to be good quality, or maybe, I don't know. Well, there are, as far as I know, the platform that we were using with this Israeli that I work with with about $20,000.

Yeah, for the platform. And he put his own branding on it, you know. And, of course, hey, yeah.

Well, keep in mind, you got to tell them that this would have took 3 months to make and you wanted it in 7 days. That's what I say about what's the quality of it? Because, yeah.

Buffy is, yeah. just you just need to have the infrastructure for you to run the operations. You know what I mean? behind the platform itself.

Yeah. Like the people that are calling and selling the people to, you know, put their money in the platform. Yeah, yeah, yeah.

No, no, that's, I mean, it's all the same, but really, just different. Just different names. Yeah, it's one sense you're saying.

I mean, but that's the same. just different amounts. Like, I'm also on a, in certain fields, the minimum open is 5000. In another field that what you're talking about, you can open 50 bucks, 100 bucks.

The difference being is you're going to get a 1000 people a month, so 10 people a month. Right. 10 people a month of all of, you know, they, um... I'll be honest with you, most of the AI around here, man, they don't even, they claim AI, but they're doing everything manually.

Yeah, yeah, yeah. It's bullshit, man. Yeah, I don't know much about it.

All I know is it's becoming very appalled to AI is that way. It definitely helps a lot of businesses. scale when it comes to, you know, when it comes to scaling, they would they would use AI and at the same time, save money because I have I have templates on my computer right now that would put 30 careers out of business forever. Like they would never need be needed to get ever, ever. forever.

And that's, you know, what's funny? Well, I wrote, I noticed that AI just very recently is because for a while I was thinking AI's gonna, like, put me out of the job. But then a few things happened recently where I know that you use AI for this.

But then when it comes down to the crunch and like the real sale, like AI could never, ever, ever do that. You just can't do that. Yeah, you can still need the...

AI will never shake your job, but a guy that knows AI can take your job. Yeah, yeah, yeah. Yeah. guy that knows AI.

AI can take a lot of people's jobs. Like in the entry level stuff, but like what I'm good at is not entry levels. like the top end of the sale, but and that's what, so I've had that, you know, themselves usually, like, AI, it will never be able to, like, twist something, the way you can twist it and the human life, just change, because you can change the course of the conversation. AI won't.

It will always like it will be trained to sell it technically how the sale is supposed to go. When you say you can change the corpus, because I will involve that in the humanization of the AI. Because I actually give the AI traits, personality traits. you can argue with it.

Yeah, yeah, yeah, you can argue it. Like, how'd you get my number? Yeah, yeah.

He'll know how to deal with that. Yeah, yeah. based on the knowledge base that you feed it. Yeah, yeah.

I, um, at an important part ourselves, There's many different, many different ways to say, and none of them are wrong. But there are so many different ways to do it. Now that I have a I like I like to get people chasing me as opposed like some people are very proactive.

I'm reacting. at a certain point itself, because if somebody is chasing me, That's better than me chasing them, right? So, for example, like, I have this this fine sense. I actually build rapport by being hard to reach.

Like, we got part of the, oh, someone might contact me. Yeah, can you call me at this time? I'm aware of business for the next 14 days.

Told you that. Oh, a little bit. Yeah, you have to.

It's such a big part. I'm away on business. You know, for the next 14 days.

And they're trying to pay something. Now, if they're trying to pay and I am not chasing their money because I'm away on business. They're desperate.

I don't need to say that. I got a deadline. You know, this is to do that, what's banking?

Whereas if you're chasing someone all the time. And AI, unless programmed, I guess you can. If AI gets a call, okay, call me at this time about payment.

Yeah, yeah, yeah, cool. And then, like, so, and then another thing, like, if somebody gives a rebuttal today, I went to the bank and I, you know, I, they told me that they didn't trust this bank

and they want to send here, then naturally, what's going to happen? They're going to give them the answers.

Yeah, but my approach to that kind of thing is, I can't really help you with that. That's something for you. Yeah, you're a man.

Yeah, I don't know what you want me to do. You know, and it has to be organic. And those little tunes and touches where they, you know, there's always, now, I know you can program AI to do so, but that's my point.

There's always going to be those little things which AI can't take my job. Is that what I'm saying? Maybe someone who knows AI, but they will be able to take so many base jobs. the qualifying, the initial sale court.

Yeah. But they won't be able... Labor logistics.

Yeah, they'll be able to take so much. And it's funny because it was after I realized that actually my job is safe. Then I was more open to AI because I was like, okay, how can I use it now?

Ain't gonna replace me. It can help me. Yeah, yeah.

And that's why I, you know, and then you messaged me and it just all kind of fell into place. as things do in that way. And do you know what's really funny about it? I do this all the time.

I'm the only person I've ever known who've done this and now you've just done it. When I explain things to people, I do this and I draw things, and if you look at it afterwards, it makes no sense. Nothing whatsoever, like if we look at it, I've looked at things, but I've explained.

And I drew that and did that to him, he was like, it made perfect sense to me. This is how I, Andrew. This is how I explain shit.

Exactly like this. And then so many times I'll do something and I go, and at the time it makes perfect sense. Now look at it the next day and I'm like, what the fuck is going on here?

I see it egg you. Yeah, yeah, yeah. And it's funny. when you started doing that, like, I understood as soon as you pulled through the 1st thing, this, I got it.

This is how I explained it. Yeah, yeah, yeah, from step one, step two. Yeah, no, and on a piece of paper, like, and I'll just, it only makes sense at the time, but you got to be there. you know what I mean?

And then... Yeah, yeah, yeah. And this is exactly how it's funny.

I mean, A fact, you do it better than I do because you can still explain this to someone. When I do it, like it makes no sense. There's a mountain, an egg, a cat, that will fuck that.

You're so you're right. Yeah, no, I don't know. At the time, it makes sense.

I know that. Yeah, yeah, that's cool. Excuse me for me. make a bold goal.

My little brother. Yeah, yeah, yeah. Oh, boy.

Sorry, let me open that for you, man. I think that was open already. I thought it was not.

Oh. That's good, good. Yeah, so you lost it, I'm still doing a good thing.

I am. I have relax. I cool some head great Right now, shit, it's a lot of friends coming out, so...

I nice school so back into fun. Yeah, very cool though, man. You know, he's he's going with taco, we're talking about, he's P.

Palman. Yeah, he's from, from, you know, he's being off top. Back then.

We just got out. one second. Yeah. Uh, as far as the AI, AI stuff, um, about about a year, about a year now, you know, this, yeah, yeah, but I know them for, for, yeah, almost the same time, you know, we, we know each other.

Because that's why I was surprised, you know, open up, and they said, let's not do that again, by the way, been talking about sign. between us. I didn't know you had no loud speaking. No, I told you, I told you, I haven't been sitting here with my partner.

I yeah I. I, I, I, I, I was intrigued because like, you know, like, I know that I've seen, and like, that's, I don't usually do that at all, man. I don't even find this talking about anybody. No, any time that he eats something like a real good seller, right?

He really, I'm going to make this one straight. And listen, and I, he sounds familiar to people that I know to have done the same thing. I, it, it, it, it, it, it, it, it, it, it, it, grind in it.

Yeah, yeah. but that's right. And definitely had my back when, you know, she comes to, you know, yeah, yeah, yeah, yeah. Yeah, it's good.

So, yeah, that's basically, bro, it's going on, like right now, you know, I'm actually doing well then. I'm all right. Yeah, yeah.

I mean, love ways, though. Yeah, yeah, yeah, yeah. Yeah, I mean, I can't complain for sure, you know.

I want that. Yeah. Yeah, I am.

I'm there, you know. And then I just, actually, you're trying to build your own. That's it, it's just, I'm not, you know, I'm better not to make another thing, you know, that.

Yeah, yeah, I'm about that. It's about time. Yeah, yeah.

And I... Yeah, remember that top we had in 2 weeks. Good, bro.

Yeah, I mean, yeah. He was like, Be doing that? And in the next couple months, 0 my god, gee, here we go.

Here we go. I stepped it up. All right?

So what's up? Yeah, I mean, you remember that. Yeah, I was saying, from that to, that's a classic.

Dude, and I was like, bro, you can do it yourself, man. Yeah, man, that. Yeah, yeah, yeah.

Go one step at a time. He was like, well, one step at a time, you're getting there. And that's just funny.

You're learning. I always said, like, I'm not, I knew, like, since I got it. I tell everybody.

I always said anything so that she said, you know, doing this and that. When we get together, I always say, man, I get together with her, that would be that, that, that change, that, you know, would change. But you are you are sort of like setting one new side where you can get a legitimate business. of course, you know, for you to step back.

That's telling the truth. No, it's not that I'm not, but it's not. I mean, but right now, I am involved in a couple of things.

Maybe, maybe, let's say real estate, maybe. Well, we got, look, I've got land in Portland. Yeah, and I'm going to go property, uh, a house on it, 500 people, so I meet the sound in Tagai. commercial as well.

Try into a business. Maybe, yeah, like maybe anything's possible. Definitely way, you know, you'll be sure like you're stepping...

Yeah, that's, I know, I mean, that does the money. money in it, you know? That's what I'd say, we won't do anything legit. It's only a cover.

There's no way that I I can't. But you can't really read it. I can't I can't keep up with the lifestyle.

If I invite a rich, it's impossible. Yeah, absolutely. Yeah, yeah, yeah, yeah.

It would definitely be just covered. It's just, yeah, yeah. And I try to keep up.

And the problem with it is they're not, they're not even one of that. It's no bit of money, but it's, it's more like, I, I had a bar that, uh, killed them. The real estate.

You have to buy the land. But that's McDonald's, you know, they don't do, it's not, it's not McDonald's that you invest in, you invest in the property, the real estate. But that's the, for me, right?

And then you sell them. That's the person. I'm not looking to like create real estate business or anything.

I see here's the thing. I don't want to be up here by in terms of, you know, super rich. I don't need to be there, like, you know.

There's a big space between struggling and super rich. There's a lot in between that and there's a little pocket of window. If you have a lot of people that, you know, they're looking into words in this company, if you have enough eggs to struggle, then you're just riding away.

There's a fine little window in there, when you go on those, and you can look nice, like, like, go on those side, you know what I mean? Yeah, and that's where I like to go right in there. I hear you. lovely That's enough.

That's enough That's just enough. That's the place to be, funny. You know what I mean?

No, it's not too, I don't, I mean, it's good, like, you know, yeah. And that's it. where I like to be. Because I've seen people, I know some people who have a stupid money, but are so greedy. that it's stressful.

And even sometimes like, I talk to them. It's not necessary stress. Yeah, it's not...

For fuck's sake, bro, like, why are you so strong? I mean, it's fine. You want to be stressed, but I don't need this stress.

Are you calling me, I'm stressing, you need that. Because you're rich, then you want to be greedy? Why are you stressing me out for you?

Slide up with joy or something, man. It's funny, I actually like it very recent. You know, I said I've been taking some time.

Very, very recently. Yeah, I was doing a bit of work for some dude. And that's the exact situation. that happened.

I think it's good time, bro. I mean, it wasn't enough, bro. It wasn't lot.

It wasn't enough for him or something? No, but it was, and this guy, he was about 31 years old. He's probably worth 25 mil, minimum.

Um, and I didn't believe it at 1st, people were telling me, and then they probably wanted to have done some work for him. I've done very well with him. I made a good, a good chunk of chain for everything, I too, it's pretty my period.

But then I realized it wasn't normal. I went, there was this 12 man there or something. And it's supposed to come in on one day and then they needed a couple of extra days and it's like, whatever, so I didn't even fucking care like that.

And then he went, It was it ruined his whole day. Oh, and I know that you, I know you just that made that cart the meal this week already. I know because I've been working with people and it's 12 brand is just totally ruined all day.

I was like, yeah, me? And then I said to him, bro, me and you were different. You wake up and you are on making a dollar from when you wake up to them, you fall asleep.

He said, I'd work hard enough to not that I have to live that way anymore. I don't wake up chasing the door. I wake up, I ask for a week, but that's when...

You know, you're really past that. I'm buying that. He's got way more money than me.

But he, that, it's, he needs it. I'm happy man. And that's why I said to him, I'm going to have to stop working with people because you're stressing me out.

Are you stressing me out? Sounds like a mirror to me. That's not me, man.

What are you talking about? And that's funny because even when I said to him, I'm 10 years older than you. I've been working hard.

I've worked hard to get to a point where now when I say I don't need to work, of course I need to work, but I don't need to get up at 9 and grind till 5, you know, I've worked hard enough to a point where I don't need to be stressed out. And then he's like, oh, so you've reached your ceiling and that kind of thing, right? imagine my ceiling here, man.

I want to deal with you every day. Holy shit. But then the thing is, and that's why he has got that kind of money because he, and that's why I, because it's there, I've got the ability, but I, I,

Automations That Will Blow Their Mind

1. Smart Lead Capture & Qualification

Objective: Capture and qualify leads dynamically based on user behavior.

Steps:

1. Dynamic Pop-Ups:
    - Trigger: If a user is reading "Premarket Movers Today."
    - Popup Message: "Want tomorrow’s movers before anyone else? Subscribe now."

Implementation:

```
<script>
document.addEventListener('DOMContentLoaded', function() {
```

```
    const premarketMoversPage =
document.querySelector('#premarket-movers-page');
    if (premarketMoversPage) {
        setTimeout(function() {
            alert('Want tomorrow's movers before anyone else? Subscribe
now.');
        }, 5000); // Show popup after 5 seconds
    }
});
</script>
```

2. AI Lead Scoring:
    - Criteria:
        - Time spent on site.
        - Pages visited (e.g., premarket analysis).
        - Outbound link clicks.
    - Segmentation:
        - Hot Leads: Aggressive nurturing.
        - Cold Leads: Slow-drip educational content.

Implementation:

```
from datetime import datetime, timedelta

def score_lead(user_data):
    score = 0
    if user_data['time_on_site'] > timedelta(minutes=5):
        score += 5
    if 'premarket_analysis' in user_data['pages_visited']:
        score += 10
    if user_data['outbound_clicks'] > 0:
        score += 3
    return score

user_data = {
    'time_on_site': timedelta(minutes=7),
    'pages_visited': ['premarket_analysis', 'home'],
    'outbound_clicks': 1
}
lead_score = score_lead(user_data)
print(f'Lead Score: {lead_score}')
```

2. Email & SMS Nurture Sequences

Objective: Automate email and SMS sequences to nurture leads.

Steps:

1. Morning Kickstart Email:
    - Schedule: 7 AM daily.
    - Content: Premarket movers and analysis.

Implementation:

```
from datetime import datetime
import smtplib
from email.mime.text import MIMEText

def send_morning_email(to_address, premarket_movers):
    subject = "Morning Kickstart: Premarket Movers"
    body = f"Good morning! Here are today's premarket
movers:\n\n{premarket_movers}"
    msg = MIMEText(body)
    msg['Subject'] = subject
    msg['From'] = 'your_email@example.com'
    msg['To'] = to_address

    with smtplib.SMTP('smtp.example.com') as server:
        server.login('your_email@example.com', 'your_password')
        server.sendmail('your_email@example.com', to_address,
msg.as_string())

premarket_movers = "TSLA up 3%, AAPL down 1%"
send_morning_email('client@example.com', premarket_movers)
```

    -

2. SMS Alerts:
    - Content: "TSLA up 4% premarket — get the full watchlist now."

Implementation:

```
from twilio.rest import Client

def send_sms(phone_number, message):
    client = Client('your_account_sid', 'your_auth_token')
    message = client.messages.create(
        body=message,
        from_='your_twilio_number',
        to=phone_number
    )
    return message.sid

phone_number = '+1234567890'
```

```
message = "TSLA up 4% premarket — get the full watchlist now."
send_sms(phone_number, message)
```

3. Behavior-Based Emails:
   - Trigger: If user clicks on "options" content.
   - Action: Send a guide to trading options premarket.

Implementation:

```
def send_behavior_based_email(to_address, content_type):
    subject = "Exclusive Guide for You"
    if content_type == 'options':
        body = "Here's a guide to trading options premarket."
    else:
        body = "Top 5 Gainers This Month."
    msg = MIMEText(body)
    msg['Subject'] = subject
    msg['From'] = 'your_email@example.com'
    msg['To'] = to_address

    with smtplib.SMTP('smtp.example.com') as server:
        server.login('your_email@example.com', 'your_password')
        server.sendmail('your_email@example.com', to_address,
msg.as_string())

to_address = 'client@example.com'
content_type = 'options'  # or 'other'
send_behavior_based_email(to_address, content_type)
```

3. Cross-Channel Retargeting

Objective: Dominate user attention across multiple platforms.

Steps:

1. Google + Facebook + Twitter/X Retargeting:
   - Implementation: Use pixel tracking to retarget users across platforms.

Example:

```
<!-- Google Pixel -->
<script async
src="https://www.googletagmanager.com/gtag/js?id=YOUR_GOOGLE_ANALYTICS_ID"
></script>
```

```
<script>
window.dataLayer = window.dataLayer || [];
function gtag(){dataLayer.push(arguments);}
gtag('js', new Date());
gtag('config', 'YOUR_GOOGLE_ANALYTICS_ID');
</script>

<!-- Facebook Pixel -->
<script>
!function(f,b,e,v,n,t,s)
{if(f.fbq)return;n=f.fbq=function(){n.callMethod?
n.callMethod.apply(n,arguments):n.queue.push(arguments)};
if(!f._fbq)f._fbq=n;n.push=n;n.loaded=!0;n.version='2.0';
n.queue=[];t=b.createElement(e);t.async=!0;
t.src=v;s=b.getElementsByTagName(e)[0];
s.parentNode.insertBefore(t,s)}(window, document,'script',
'https://connect.facebook.net/en_US/fbevents.js');
fbq('init', 'YOUR_FACEBOOK_PIXEL_ID');
fbq('track', 'PageView');
</script>
<noscript><img height="1" width="1" style="display:none"
src="https://www.facebook.com/tr?id=YOUR_FACEBOOK_PIXEL_ID&ev=PageView&nos
cript=1"
/></noscript>

<!-- Twitter Pixel -->
<script>
!function(e,t,n,s,u,a){e.twq||(s=e.twq=function(){s.que=s.que||[];s.que.pu
sh(arguments)});a=t.createElement(n);a.async=!0;a.src=u;a.id='twq';t.head.
appendChild(a)}(window,document,'script','https://static.ads-twitter.com/u
wt.js');
twq('init','YOUR_TWITTER_PIXEL_ID');
twq('track','PageView');
</script>
```

-

2. Dynamic Ads:
   - Implementation: Show users the exact content they last read.

Example:

```
<!-- Dynamic Ad Example -->
<script>
function showDynamicAd(userData) {
    const adContent = userData.last_read_article;
    document.getElementById('dynamic-ad').innerHTML = adContent;
}
```

```
const userData = {
    last_read_article: '<p>Check out this article on premarket
movers!</p>'
};
showDynamicAd(userData);
</script>
<div id="dynamic-ad"></div>
```

3. YouTube Pre-Roll:
    - Implementation: Target users who visited your site.

Example:

```
<!-- YouTube Pre-Roll Ad Example -->
<script>
function showYouTubePreRoll() {
    alert('Hey, saw you looking at today's premarket movers — don't miss
tomorrow's. Join free.');
}

showYouTubePreRoll();
</script>
```

4. AI Chatbot That Converts

Objective: Build a trader-style chatbot to engage and qualify leads.

Steps:

1. Chatbot Script:

Implementation:

```
<script>
function initChatbot() {
    const chatbot = document.getElementById('chatbot');
    chatbot.innerHTML = 'Premarket bot here 👋 Want today's biggest movers
or tomorrow's watchlist?';
}

initChatbot();
</script>
<div id="chatbot"></div>
```

2. Integrate with Newsletter Signup:

Implementation:

```
<script>
function subscribeToNewsletter(email) {
    // Logic to subscribe user to newsletter
    alert('Subscribed successfully!');
}

function handleChatbotResponse(response) {
    if (response.includes('subscribe')) {
        const email = prompt('Enter your email to subscribe:');
        subscribeToNewsletter(email);
    }
}

handleChatbotResponse('I want to subscribe to the newsletter.');
</script>
```

5. Automation for Premium Conversions

Objective: Convert free users to premium subscribers.

Steps:

1. Free-to-Paid Upgrade Path:
    - Day 1–7: Free newsletter.
    - Day 8: Offer premium alerts.
    - Day 14: Show blurred-out premium content.

Implementation:

```
from datetime import datetime, timedelta

def send_premium_offer(to_address, days_since_signup):
    if days_since_signup == 8:
        subject = "Upgrade to Premium Alerts"
        body = "Get premium alerts for $X/month. Don't miss out!"
    elif days_since_signup == 14:
        subject = "See What You're Missing"
        body = "Here's a sneak peek of our premium content. Upgrade now!"
    else:
        return
```

```
    msg = MIMEText(body)
    msg['Subject'] = subject
    msg['From'] = 'your_email@example.com'
    msg['To'] = to_address

    with smtplib.SMTP('smtp.example.com') as server:
        server.login('your_email@example.com', 'your_password')
        server.sendmail('your_email@example.com', to_address,
msg.as_string())

to_address = 'client@example.com'
days_since_signup = 8  # or 14
send_premium_offer(to_address, days_since_signup)
```

2. Scarcity Triggers:

Implementation:

```
def send_scarcity_email(to_address, scarcity_message):
    subject = "Limited Time Offer"
    body = scarcity_message
    msg = MIMEText(body)
    msg['Subject'] = subject
    msg['From'] = 'your_email@example.com'
    msg['To'] = to_address

    with smtplib.SMTP('smtp.example.com') as server:
        server.login('your_email@example.com', 'your_password')
        server.sendmail('your_email@example.com', to_address,
msg.as_string())

to_address = 'client@example.com'
scarcity_message = "Only 50 seats left for premium alerts. Act now!"
send_scarcity_email(to_address, scarcity_message)
```

3. Upsell Automation:

Implementation:

```
def send_upsell_offer(to_address, open_rate):
    if open_rate > 0.8:
        subject = "Exclusive Offer for You"
        body = "Upgrade to premium for a one-time discount. Don't miss
this chance!"
        msg = MIMEText(body)
        msg['Subject'] = subject
```

```
        msg['From'] = 'your_email@example.com'
        msg['To'] = to_address

        with smtplib.SMTP('smtp.example.com') as server:
            server.login('your_email@example.com', 'your_password')
            server.sendmail('your_email@example.com', to_address,
msg.as_string())

to_address = 'client@example.com'
open_rate = 0.85  # Example open rate
send_upsell_offer(to_address, open_rate)
```

-

6. Data-Driven Feedback Loops

Objective: Use data to optimize content and user experience.

Steps:

1. Heatmaps & Tracking:
    - Implementation: Use tools like Hotjar or MS Clarity.

Example:

```
<!-- Hotjar Tracking Code -->
<script>
(function(h,o,t,j,a,r){
    h.hj=h.hj||function(){(h.hj.q=h.hj.q||[]).push(arguments)};
    h._hjSettings={hjid:YOUR_HOTJAR_ID,hjsv:6};
    a=o.getElementsByTagName('head')[0];
    r=o.createElement('script');r.async=1;
    r.src=t+h._hjSettings.hjid+j+h._hjSettings.hjsv;
    a.appendChild(r);
})(window,document,'https://static.hotjar.com/c/hotjar-','.js?sv=');
</script>
```

-

2. AI Report Summaries:
    - Implementation: Automatically email weekly reports.

Example:

```
def send_weekly_report(to_address, report_content):
    subject = "Weekly Report: Top Content That Converted Leads"
    body = report_content
    msg = MIMEText(body)
```

```
    msg['Subject'] = subject
    msg['From'] = 'your_email@example.com'
    msg['To'] = to_address

    with smtplib.SMTP('smtp.example.com') as server:
        server.login('your_email@example.com', 'your_password')
        server.sendmail('your_email@example.com', to_address,
msg.as_string())

to_address = 'client@example.com'
report_content = "Here’s what worked this week..."
send_weekly_report(to_address, report_content)
```

    -

3. A/B Testing Automation:
    - Implementation: Rotate ad creatives and landing pages.

Example:

```
import random

def rotate_ad_creative():
    ad_creatives = [
        "Creative 1",
        "Creative 2",
        "Creative 3"
    ]
    return random.choice(ad_creatives)

ad_creative = rotate_ad_creative()
print(f'Selected Ad Creative: {ad_creative}')
```

    -

Step-by-Step Playbook

1. Set up the foundation:
    - CRM: HubSpot, ActiveCampaign, or GoHighLevel.
    - Pixel tracking: Google, Meta, Twitter.
    - AI chatbot: ManyChat, Intercom, or custom GPT-powered bot.
2. Automate nurturing:
    - 7-day welcome series: Email + SMS.
    - Behavior-based triggers: Clicked options → send options content.
3. Turn on omnipresent retargeting:
    - Dynamic display ads.
    - YouTube pre-roll targeting site visitors.
4. Build upgrade funnels:

    - Free → paid content sequences.
    - Scarcity-driven automations.
5. Report like a boss:
    - Weekly automation: Send client "Here's how many leads converted, here's your ROI, here's what to double down on."

By following this playbook, you can create a comprehensive and effective automation strategy that will blow your clients' minds and

Daily Premarket Reports

Format: 2–3 minute reads or 60-second video snippets.

Content Breakdown:

1. Premarket Movers:
    - Objective: Identify the biggest gainers and losers before the market opens.
    - Content: List the top 5 gainers and losers with brief explanations of why they are moving.

Example:

```
**Premarket Movers:**
- **Biggest Gainers:**
  1. **Tesla (TSLA):** +5.2% on strong earnings report.
  2. **Apple (AAPL):** +3.1% due to positive analyst upgrades.
  3. **NVIDIA (NVDA):** +4.5% following AI breakthrough news.
- **Biggest Losers:**
  1. **Amazon (AMZN):** -2.8% after disappointing sales figures.
  2. **Microsoft (MSFT):** -1.9% due to cloud service concerns.
  3. **Google (GOOGL):** -2.1% on regulatory worries.
```

    -

2. Futures Snapshot:
    - Objective: Provide a quick update on key futures markets.
    - Content: Brief overview of S&P 500, Nasdaq, Dow Jones, and Russell 2000 futures.

Example:

```
**Futures Snapshot:**
- **S&P 500:** +0.3% pre-market
- **Nasdaq:** +0.4% pre-market
- **Dow Jones:** +0.2% pre-market
- **Russell 2000:** +0.1% pre-market
```

-

3. Sector Watch:
    - Objective: Highlight hot sectors and their performance.
    - Content: Focus on sectors like AI, energy, biotech, and explain why they are trending.

Example:

```
**Sector Watch:**
- **AI Sector:** Up 2.5% on new AI advancements.
- **Energy Sector:** Down 1.2% due to oil price fluctuations.
- **Biotech Sector:** Up 1.8% on positive clinical trial results.
```

-

4. Global Market Pulse:
    - Objective: Provide insights into overnight market movements in Asia and Europe.
    - Content: Summarize key movements and their potential impact on the U.S. market.

Example:

```
**Global Market Pulse:**
- **Asia:** Nikkei up 1.5%, Hang Seng down 0.8%.
- **Europe:** DAX up 0.9%, FTSE down 0.5%.
```

-

5. Earnings & Fed Watch:
    - Objective: Keep track of key earnings releases and Fed-related events.
    - Content: List upcoming earnings reports and Fed meetings with expected impacts.

Example:

```
**Earnings & Fed Watch:**
- **Upcoming Earnings:** Tesla (TSLA), Apple (AAPL), Microsoft (MSFT).
- **Fed Meeting:** Next meeting on March 22, expectations for rate hike.
```

-

Actionable Trading Content

Format: Infographics, carousel-style posts, or short-form video.

Content Breakdown:

1. Stocks to Watch Lists:
    - Objective: Provide a list of top stocks with catalysts.

- Content: Top 5 stocks with reasons for their potential movement (earnings, news, analyst upgrades).

Example:

```
**Stocks to Watch:**
1. **Tesla (TSLA):** Earnings report expected to beat estimates.
2. **Apple (AAPL):** New product launch rumored for next week.
3. **NVIDIA (NVDA):** Analyst upgrade to 'Buy' rating.
4. **Amazon (AMZN):** Expansion into new markets.
5. **Microsoft (MSFT):** Cloud service contracts won.
```

2. Options Flow Highlights:
   - Objective: Breakdown unusual options activity.
   - Content: Identify and explain significant options trades and their implications.

Example:

```
**Options Flow Highlights:**
- **Tesla (TSLA):** Large call options bought, indicating bullish sentiment.
- **Apple (AAPL):** Put options activity suggests potential downside risk.
```

3. Crypto Corner:
   - Objective: Provide updates on cryptocurrency movements.
   - Content: Cover Bitcoin, Ethereum, altcoins, and macro signals affecting the crypto market.

Example:

```
**Crypto Corner:**
- **Bitcoin (BTC):** Up 3.2% on positive regulatory news.
- **Ethereum (ETH):** Down 1.5% due to network congestion.
- **Altcoins:** Solana (SOL) up 5.0% on new partnerships.
```

4. Hot IPO/Secondary Spotlights:
   - Objective: Highlight upcoming IPOs and secondary offerings.
   - Content: Provide details on what's coming and why it matters.

Example:

```
**Hot IPO/Secondary Spotlights:**
- **Upcoming IPO:** XYZ Corp, expected to raise $500M.
- **Secondary Offering:** ABC Inc, adding $300M to market capitalization.
```

-

Deep-Dive Features

Format: Detailed articles, interviews, and opinion pieces.

Content Breakdown:

1. Playbook Articles:
    - Objective: Provide in-depth trading strategies and insights.
    - Content: Articles on specific trading techniques and market analysis.
    - Examples:
        - "How to Trade Earnings Gaps"
        - "3 Ways to Spot Market Manipulation Before It Hits"
        - "Smart Money vs. Dumb Money: Who's Really Winning?"
2. Interviews & Opinions:
    - Objective: Share insights from industry experts.
    - Content: Short Q&As with traders, analysts, or influencers.

Example:

```
**Interview with John Doe, Market Analyst:**
Q: What are your thoughts on the current market volatility?
A: The current volatility is driven by geopolitical tensions and economic
data releases. Traders should focus on defensive sectors and diversify
their portfolios.
```

    -
3. The Psychology Series:
    - Objective: Explore the psychological aspects of trading.
    - Content: Articles on trader behavior and mental strategies.
    - Examples:
        - "Why traders panic sell"
        - "The dopamine rush of green days"

Community-Driven Content

Format: Interactive polls, user-submitted content, and weekly recaps.

Content Breakdown:

1. Polls:
    - Objective: Engage the community with interactive polls.
    - Content: Create polls on trending topics and share the results.

Example:

```
**Poll:** Which stock runs first — NVDA or TSLA?
- **NVDA:** 45%
- **TSLA:** 55%
```

2. User-submitted Charts:
   - Objective: Feature trader setups with commentary.
   - Content: Allow users to submit their trading charts and provide analysis.

Example:

```
**User-submitted Chart:**
- **Trader:** Jane Doe
- **Setup:** Bullish flag pattern on AAPL.
- **Commentary:** "Looking for a breakout above $150 with a target of
$160."
```

3. Weekly Recap Newsletter:
   - Objective: Provide a weekly summary of key market events.
   - Content: Highlight the most impactful charts and market movements of the week.

Example:

```
**Weekly Recap Newsletter:**
- **5 Charts That Mattered This Week:**
  1. **Tesla (TSLA):** Bullish breakout on strong earnings.
  2. **Apple (AAPL):** Resistance at $150 holds.
  3. **NVIDIA (NVDA):** AI-driven rally continues.
  4. **Amazon (AMZN):** Support at $3000 holds.
  5. **Microsoft (MSFT):** Cloud services drive growth.
```

Content Formats to Dominate Attention

Format: Short-form videos, infographics, and podcasts.

Content Breakdown:

1. TikTok/IG Shorts:
   - Objective: Quick, engaging video content.
   - Content: "Top 3 Premarket Movers in 30 Seconds."

Example:

```
**TikTok/IG Shorts:**
- **Video Title:** "Top 3 Premarket Movers in 30 Seconds"
- **Content:** Quick cuts of the top 3 gainers/losers with brief explanations.
```

2. Twitter/X Threads:
   - Objective: Detailed, thread-style updates.
   - Content: "Premarket breakdown: Futures green, oil at highs, watch these tickers 👇"

Example:

```
**Twitter/X Thread:**
1/3 Premarket breakdown: Futures are green, oil at highs. Here are the tickers to watch today.
2/3 Top gainers: TSLA, AAPL, NVDA. Top losers: AMZN, MSFT, GOOGL.
3/3 Sector watch: AI and energy sectors are hot. Stay tuned for more updates!
```

3. YouTube Shorts:
   - Objective: 1-minute recaps with bold headlines.
   - Content: "1-min recap with bold headlines."

Example:

```
**YouTube Shorts:**
- **Video Title:** "1-min Premarket Recap"
- **Content:** Bold headlines and quick updates on market movers.
```

4. Podcasts:
   - Objective: 10-minute morning audio briefings for traders.
   - Content: Detailed market analysis and trading tips.

Example:

```
**Podcast Episode:**
- **Title:** "Morning Market Briefing"
- **Content:** 10-minute audio briefing covering premarket movers, futures snapshot, sector watch, and global market pulse.
```

By following this structured approach, you can create a comprehensive and engaging content strategy that covers all aspects of daily premarket reports, actionable trading content, deep-dive features, community-driven content, and various content formats to dominate attention. 🚀⚙️

Business Service Agreement

Phase 1: AI Agent Appointment Setting

Objective: Schedule appointments with potential clients and follow up with them to ensure they are added to the client's calendar.

Steps:

1. Appointment Scheduling:
    - Utilize AI-powered scheduling tools to automate the process of setting appointments.
    - Integrate with the client's calendar (e.g., Google Calendar, Outlook) to ensure appointments are automatically added.
2. Follow-Up Communication:
    - Send automated follow-up emails or text messages to confirm the appointment details.
    - Use AI to personalize the follow-up messages, making them more engaging and effective.
3. Calendar Integration:
    - Ensure that all scheduled appointments are seamlessly integrated into the client's calendar.
    - Provide reminders and notifications to both the client and the potential lead to minimize no-shows.

Example Implementation:

```
from datetime import datetime, timedelta
import smtplib
from email.mime.text import MIMEText

def schedule_appointment(client_email, client_name, appointment_time):
    # Logic to schedule appointment and send confirmation
    confirmation_message = f"Hello {client_name},\n\nYour appointment is
confirmed for {appointment_time}."
```

```
    send_email(client_email, "Appointment Confirmation",
confirmation_message)

def send_email(to_address, subject, body):
    msg = MIMEText(body)
    msg['Subject'] = subject
    msg['From'] = 'your_email@example.com'
    msg['To'] = to_address

    with smtplib.SMTP('smtp.example.com') as server:
        server.login('your_email@example.com', 'your_password')
        server.sendmail('your_email@example.com', to_address,
msg.as_string())

# Example usage
schedule_appointment('client@example.com', 'John Doe', datetime.now() +
timedelta(days=1))
```

Phase 2: Content Creation and Media Management

Objective: Create and manage high-quality content for various media platforms, ensuring consistency and engagement.

Steps:

1. Content Generation:
    - Use AI to generate text, images, and videos tailored to the client's brand and audience.
    - Ensure content is optimized for each platform (e.g., Instagram, Facebook, Twitter).
2. Media Management:
    - Store and organize media assets in a centralized repository.
    - Use AI to tag and categorize media for easy retrieval and management.
3. Posting Schedule:
    - Create a content calendar to plan and schedule posts in advance.
    - Automate the posting process using APIs and scheduling tools.

Example Implementation:

```
import os
import requests
from dotenv import load_dotenv
from PIL import Image
```

```python
import moviepy.editor as mp
import random

# Load environment variables
load_dotenv()

# API endpoints and tokens
facebook_access_token = os.getenv('FACEBOOK_ACCESS_TOKEN')
instagram_access_token = os.getenv('INSTAGRAM_ACCESS_TOKEN')
twitter_api_key = os.getenv('TWITTER_API_KEY')
twitter_api_secret = os.getenv('TWITTER_API_SECRET')
twitter_access_token = os.getenv('TWITTER_ACCESS_TOKEN')
twitter_access_secret = os.getenv('TWITTER_ACCESS_SECRET')
linkedin_client_id = os.getenv('LINKEDIN_CLIENT_ID')
linkedin_client_secret = os.getenv('LINKEDIN_CLIENT_SECRET')
linkedin_access_token = os.getenv('LINKEDIN_ACCESS_TOKEN')
tiktok_access_token = os.getenv('TIKTOK_ACCESS_TOKEN')
youtube_api_key = os.getenv('YOUTUBE_API_KEY')
youtube_access_token = os.getenv('YOUTUBE_ACCESS_TOKEN')

# Function to post on Facebook
def post_to_facebook(message, image_path=None, video_path=None):
    url = 'https://graph.facebook.com/me/feed'
    params = {
        'access_token': facebook_access_token,
        'message': message
    }
    if image_path:
        params['url'] = image_path
    if video_path:
        params['url'] = video_path
    response = requests.post(url, params=params)
    return response.json()

# Function to generate a random image
def generate_random_image():
    image = Image.new('RGB', (100, 100), color = random.choice(['red',
'green', 'blue']))
    image_path = 'random_image.png'
    image.save(image_path)
    return image_path

# Function to generate a random video
def generate_random_video():
    clip = mp.TextClip("Hello, World!", fontsize=70, color='white')
    clip = clip.set_position('center').set_duration(5)
    clip.write_videofile("random_video.mp4", fps=24)
```

```
    return "random_video.mp4"

# Main function to post content
def main():
    message = "Check out this awesome content!"
    image_path = generate_random_image()
    video_path = generate_random_video()

    # Post to all platforms
    post_to_facebook(message, image_path)
    post_to_instagram(image_path, message)
    post_to_twitter(message, image_path)
    post_to_linkedin(message, image_path)
    post_to_tiktok(video_path, message)
    post_to_youtube(message, message, video_path)

if __name__ == '__main__':
    main()
```

Phase 3: Website and Landing Page, Funnel All Clients to the Page to Speak with Chat AI Super Agent Bot

Objective: Create a professional website and landing page that funnels all clients to speak with the AI chatbot.

Steps:

1. Website Development:
    - Design and develop a responsive and user-friendly website.
    - Ensure the website is optimized for SEO and mobile devices.
2. Landing Page Creation:
    - Create a dedicated landing page that highlights the benefits of the AI chatbot.
    - Include clear calls-to-action (CTAs) to encourage visitors to engage with the chatbot.
3. Chatbot Integration:
    - Integrate the AI chatbot into the website and landing page.
    - Ensure the chatbot is capable of handling a wide range of queries and providing valuable information to visitors.

Example Implementation:

```
<!DOCTYPE html>
<html lang="en">
```

```
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>AI Chatbot Landing Page</title>
    <style>
        body {
            font-family: Arial, sans-serif;
            margin: 0;
            padding: 0;
            background-color: #f4f4f4;
        }
        .container {
            max-width: 800px;
            margin: 0 auto;
            padding: 20px;
            background-color: #fff;
            box-shadow: 0 0 10px rgba(0, 0, 0, 0.1);
        }
        h1 {
            text-align: center;
            color: #333;
        }
        p {
            font-size: 18px;
            color: #666;
        }
        .chatbot-container {
            margin-top: 20px;
            border: 1px solid #ccc;
            padding: 10px;
            border-radius: 5px;
        }
    </style>
</head>
<body>
    <div class="container">
        <h1>Welcome to Our AI Chatbot</h1>
        <p>Our AI chatbot is here to help you with all your queries. Feel
free to ask any questions you have!</p>
        <div class="chatbot-container" id="chatbot-container">
            <!-- Chatbot will be integrated here -->
        </div>
    </div>
    <script>
        // JavaScript to integrate the chatbot
        document.addEventListener('DOMContentLoaded', function() {
```

```
            const chatbotContainer =
document.getElementById('chatbot-container');
            // Add your chatbot integration code here
        });
    </script>
</body>
</html>
```

Phase 4: Digital Marketing SEO/PPC

Objective: Enhance the client's online presence through effective SEO and PPC strategies.

Steps:

1. SEO Optimization:
    - Conduct keyword research to identify high-volume, low-competition keywords.
    - Optimize the website and content for these keywords to improve search engine rankings.
2. PPC Campaigns:
    - Create and manage PPC campaigns on platforms like Google Ads and social media.
    - Monitor and optimize campaigns to maximize ROI.
3. Analytics and Reporting:
    - Use analytics tools to track the performance of SEO and PPC efforts.
    - Provide regular reports to the client, highlighting key metrics and areas for improvement.

Example Implementation:

```
from googleads import adwords
from googleads.oauth2 import GoogleRefreshTokenClient

def create_ppc_campaign(client, campaign_name, budget):
    campaign_service = client.GetService('CampaignService',
version='v201809')
    operations = []

    campaign = {
        'name': campaign_name,
        'status': 'PAUSED',
        'advertisingChannelType': 'SEARCH',
        'biddingStrategyConfiguration': {
```

```
            'bids': [{
                'xsi_type': 'CpcBid',
                'bid': {
                    'microAmount': 1000000  # Example bid amount
                }
            }]
        },
        'budget': {
            'budgetId': budget
        },
        'networkSetting': {
            'targetGoogleSearch': True,
            'targetSearchNetwork': False,
            'targetContentNetwork': False,
            'targetPartnerSearchNetwork': False
        }
    }

    operations.append({
        'operator': 'ADD',
        'operand': campaign
    })

    response = campaign_service.mutate(operations)
    return response

# Example usage
client = GoogleRefreshTokenClient(client_id='your_client_id',
client_secret='your_client_secret', refresh_token='your_refresh_token')
budget = 'your_budget_id'
create_ppc_campaign(client, 'Example Campaign', budget)
```

Phase 5: CRM Setup and Integration Plus Automation

Objective: Set up and integrate a CRM system to manage client interactions and automate workflows.

Steps:

1. CRM Selection and Setup:
    - Choose a suitable CRM system (e.g., Salesforce, HubSpot, Zoho CRM).
    - Set up the CRM and configure it to meet the client's specific needs.
2. Integration:

    - Integrate the CRM with other tools and platforms used by the client (e.g., email marketing, social media, website).
    - Ensure seamless data flow between the CRM and other systems.
3. Automation:
    - Automate repetitive tasks and workflows within the CRM.
    - Use AI to predict and suggest actions based on client data and interactions.

Example Implementation:

```
import requests

def create_crm_contact(crm_api_url, api_key, contact_data):
    headers = {
        'Authorization': f'Bearer {api_key}',
        'Content-Type': 'application/json'
    }
    response = requests.post(crm_api_url, headers=headers,
json=contact_data)
    return response.json()

# Example usage
crm_api_url = 'https://api.yourcrm.com/contacts'
api_key = 'your_api_key'
contact_data = {
    'first_name': 'John',
    'last_name': 'Doe',
    'email': 'john.doe@example.com',
    'phone': '123-456-7890'
}
create_crm_contact(crm_api_url, api_key, contact_data)
```

Conclusion

By following these phases, we ensure a comprehensive and effective business service agreement that covers all aspects of AI agent appointment setting, content creation, website development, digital marketing, and CRM integration. This structured approach will help the client achieve their goals and maximize their on

AI Super-Agent Workflow for IPO Lead Generation

Step 1: Data Collection and Market Intelligence

1. Market Trends and Analysis
    - Use web scraping tools to gather data from financial news sites, SEC filings, and industry reports.
    - Set up RSS feeds and alerts for keywords like "IPO," "venture capital," " Series A/B/C funding," and "exit strategies."
    - Analyze market trends using natural language processing (NLP) to identify emerging sectors and hot industries.
2. Company Databases
    - Scrape and parse data from company databases like Crunchbase, AngelList, and PitchBook.
    - Focus on startups that have recently raised significant funding rounds (Series B and beyond).

Step 2: Lead Identification and Qualification

1. Initial Screening
    - Filter companies based on criteria such as funding stage, industry, revenue growth, and market potential.
    - Use machine learning models to predict which companies are likely to go public within the next 1-3 years.
2. Deep Dive Analysis
    - Conduct in-depth analysis on shortlisted companies, including financial health, management team, competitive landscape, and market positioning.
    - Use sentiment analysis on social media and news articles to gauge public perception and market sentiment.

Step 3: Lead Enrichment and Prioritization

1. Data Enrichment
    - Enrich lead data with additional information such as key executives' LinkedIn profiles, recent press releases, and patent filings.
    - Use APIs to pull in real-time data from financial markets and news sources.
2. Scoring and Prioritization
    - Develop a scoring system based on various factors like funding history, growth metrics, market traction, and strategic fit.
    - Prioritize leads based on their scores and the likelihood of a successful IPO.

Step 4: Outreach and Engagement

1. Personalized Messaging
    - Craft personalized outreach emails and LinkedIn messages tailored to each lead.
    - Highlight the benefits of going public with your IPO firm and how you can help them achieve their goals.
2. Automated Follow-ups

    - Set up automated follow-up sequences to keep the conversation going without manual intervention.
    - Use A/B testing to optimize email subject lines, content, and call-to-actions.

Step 5: Relationship Building and Nurturing

1. Regular Check-ins
    - Schedule regular check-ins with high-potential leads to build relationships and provide value-added insights.
    - Share market intelligence, industry trends, and success stories of other companies you've helped go public.
2. Event Invitations
    - Invite leads to exclusive events, webinars, and networking opportunities to strengthen your relationship and position your firm as a thought leader.

Step 6: Conversion and Onboarding

1. Proposal and Pitch
    - Prepare a compelling proposal and pitch deck tailored to each lead, highlighting your firm's unique value proposition and track record.
    - Use data-driven insights and success stories to build credibility and trust.
2. Onboarding Process
    - Streamline the onboarding process with clear communication, defined next steps, and dedicated support.
    - Ensure a smooth transition from lead to client, setting the stage for a successful IPO journey.

Tools and Technologies

- Web Scraping: BeautifulSoup, Scrapy, Selenium
- NLP and Sentiment Analysis: spaCy, NLTK, TextBlob, VADER
- Machine Learning: Scikit-learn, TensorFlow, PyTorch
- Data Enrichment: Clearbit, FullContact, Hunter.io
- Automation: Zapier, Integromat, Microsoft Power Automate
- CRM: HubSpot, Salesforce, Pipedrive
- Email Marketing: Mailchimp, SendGrid, ActiveCampaign

Call to Action

Set up a meeting with your tech team to start implementing this workflow. We'll need to integrate various tools and technologies to create a seamless, automated lead generation machine. Once we've got the basics in place, we can start fine-tuning and optimizing the process to maximize our IPO lead pipeline.

Let's get this show on the road and start dominating the IPO market! 🚀💸
